Rajahmundry, India | nikhilgogineni.22@gmail.com | +91 93984 45220 | LinkedIn | GitHub

PROFILE

B.Tech Data Science student with a strong foundation in backend development and machine learning. Proficient in Python, Django, and Java, with hands-on experience building RESTful APIs, managing databases, and solving real-world engineering problems. Passionate about building end-to-end systems that are clean, functional, and production-ready.

SKILLS

Languages & Web Technologies: Python, Java, HTML5

Databases: MySQL, MongoDB

Frameworks & Development: Django, REST API Development

Cloud & Machine Learning: AWS, NumPy, Pandas, Matplotlib, NLTK

Tools: Git, Celery, Redis, Docker

Soft Skills: Team Collaboration, Adaptability, Presentation

EXPERIENCE

Software Engineer Intern — UVXYZ Labs Pvt Ltd, Hyderabad

Jul 2025 – Dec 2025

- Built and maintained web applications using Python and Django (MVT architecture) for production backend services.
- Tracked and resolved bugs across the codebase, improving overall application stability and test coverage.

Student Intern — Jala Academy, Hyderabad

Jun 2024 – Jul 2024

- Completed an intensive Java training program focused on OOP principles and practical application development.
- Built a fully functional Java Calculator from scratch and demonstrated the underlying logic to peers and mentors.

PROJECTS

IP102 Pest Identification Web App

PyTorch, Django, ResNet-50, OpenCV, Albumentations

- Fine-tuned a ResNet-50 classifier on the IP102 dataset (102 pest classes), achieving Top-1 73.6%, Top-3 88.8%, and Top-5 92.4% accuracy on the held-out test set.
- Generated 3 model artifacts (checkpoint, weights, full model) and served predictions via a Django REST backend with clean JSON output.
- Built a browser-based interface with drag-and-drop image upload, live preview, and a confidence-ranked Top-5 prediction list rendered in real time.

Smart Inventory Demand Forecaster

Django, XGBoost, Celery, Redis, MongoDB, PostgreSQL

- Built an end-to-end forecasting pipeline on ~1M daily sales records (Rossmann Store Sales) to predict inventory needs and optimize supply chain operations.
- Engineered 35 time-series features including lag variables and rolling averages; trained a 1,000-estimator XGBoost regressor that outperformed a Random Forest baseline on RMSE.
- Deployed an interactive dashboard delivering 12-week store-level demand projections with visual breakdowns of promotional and holiday impact for stakeholders.

Dynamic Blogging Platform

Python, Django, Django REST Framework, SQLite

- Designed relational database models for posts, comments, and authors using Django ORM with full CRUD support via DRF-powered REST endpoints.
- Built a session-based "Read Later" feature allowing users to bookmark posts across sessions without requiring authentication.
- Created a custom admin dashboard with content moderation tools, enabling editors to manage posts and comments through a clean, intuitive interface.

EDUCATION

B.Tech in Data Science & Artificial Intelligence — CGPA: 6.84

Aug 2022 – 2026

The ICFAI Foundation for Higher Education (IFHE), Hyderabad

Intermediate (MPC) — 61.2%

Apr 2020 – 2022

Bhashyam Junior College, Rajahmundry

CERTIFICATIONS & WORKSHOPS

AWS Cloud Practitioner Essentials — Amazon Web Services

Mar 2026

Zoho Creator App Development Workshop — Zoho Corporation

Jan 2026

Data Processing and Visualization — FutureSkills Prime (Gold Badge)

Feb 2024
